

Welcome/Registration Page

- One-time registration on startup. User will be automatically logged in afterwards.
- Logo TBD
- Background color + welcome screen to be added.
- Every lock constructed will have a unique ID. This will be input on app startup, to register it to the user.

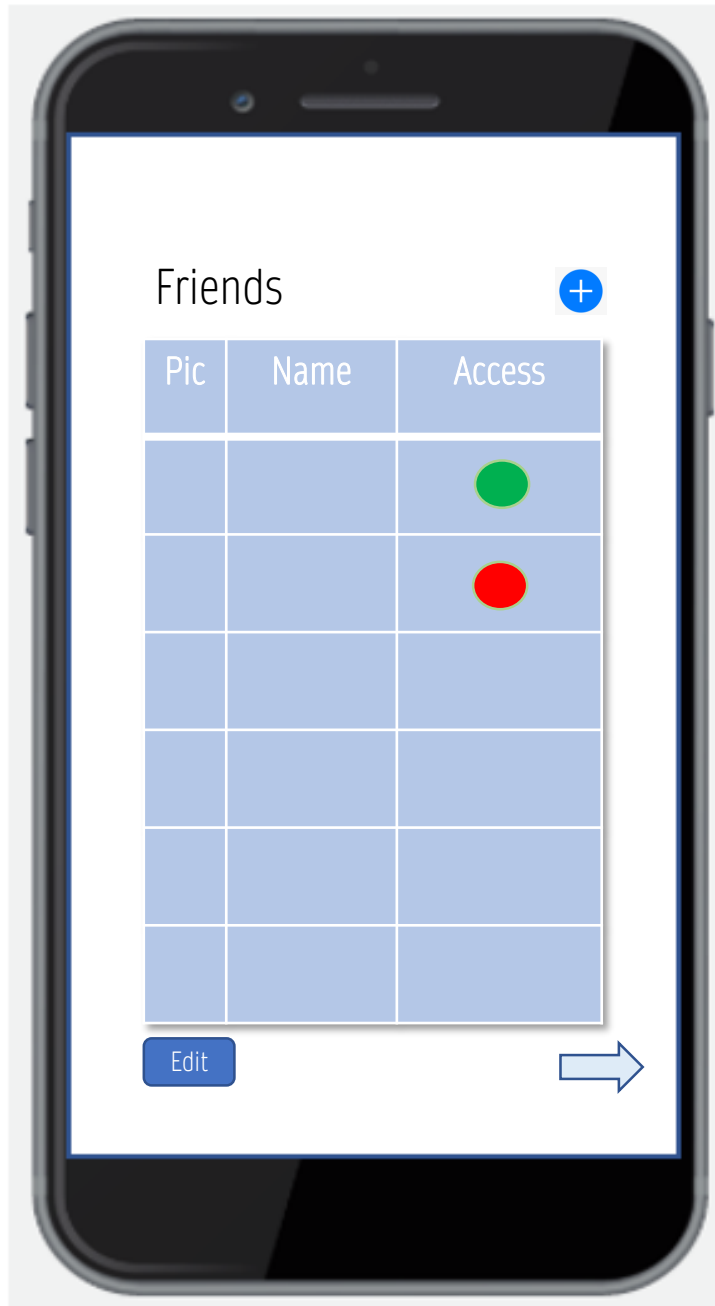

Home Page

- Center button displays current status of lock.
- Button will shift from green to red according to the status of the lock. Icon may also change.
- Clicking the button will lock/unlock the device.
- If you have access to multiple locks, it will open a list of nearby locks you have access to, to choose from.
- Clicking your profile picture will redirect you to your profile page.
- Clicking "Friends" will redirect you to your friends list.

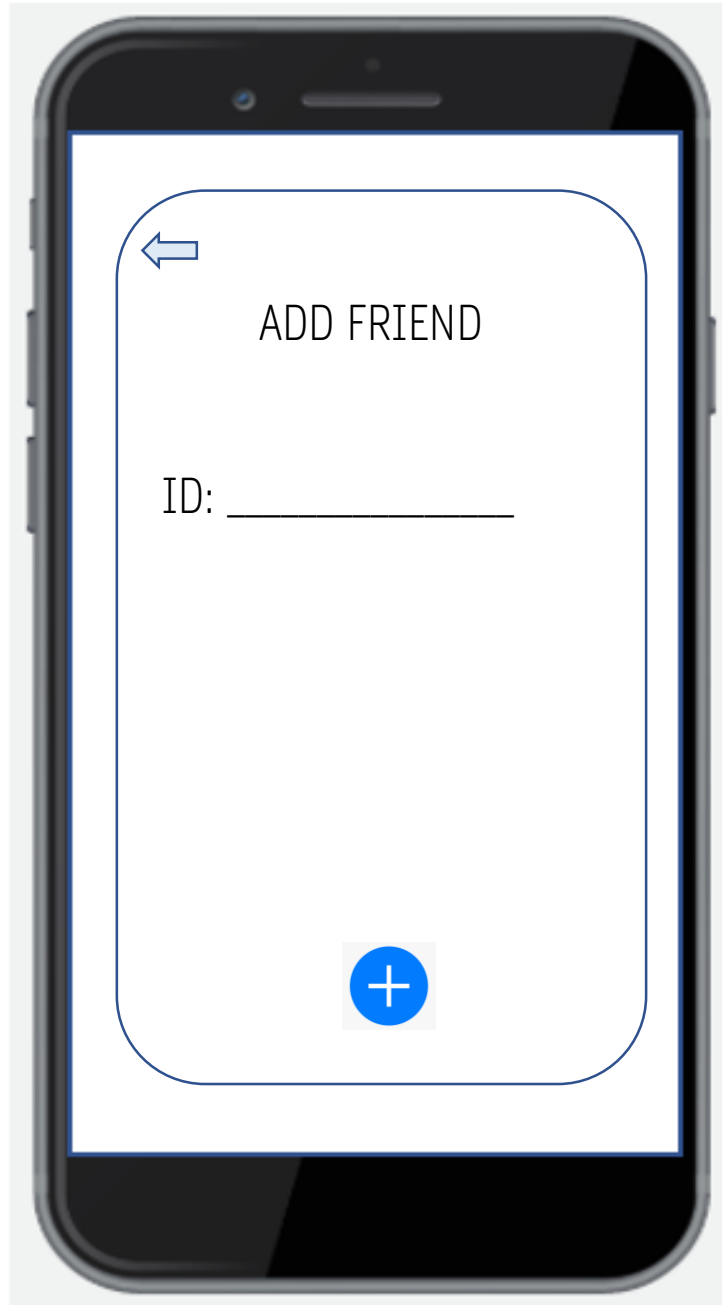

Profile Page

- Every user has a unique User ID, randomly generated during registration. This can't be edited.
- Lock ID, Name, and Profile Picture can be edited.

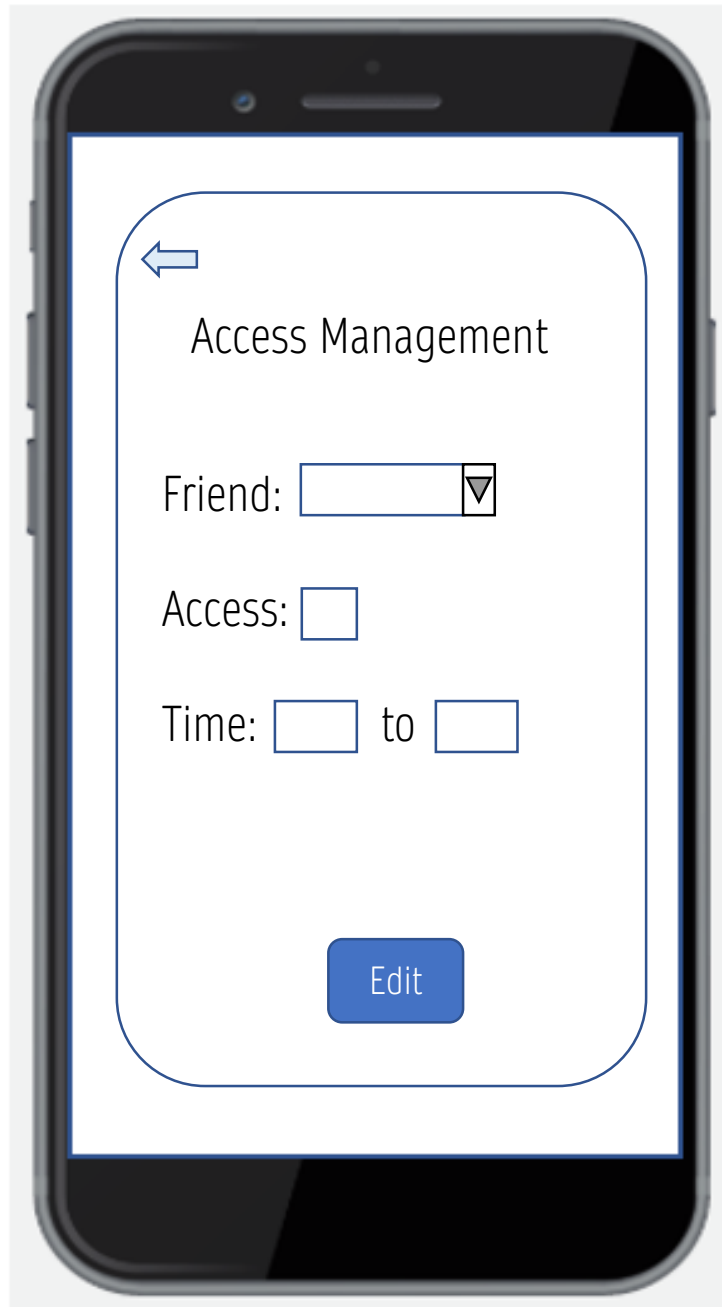

Friends List

- Displays the profile picture and name of all friends currently added.
- Displays current access permissions of each friend. Green means they currently have access to your lock.
- The + icon allows you to add a new friend. This redirects you to the "Add Friend" page.
- Clicking edit redirects you to the "Access Management" page.
- The right arrow allows you to scroll through your friends list.

Add Friend Page

- This page allows you to add a new friend.
- To add a friend, you only need their User ID, which they can find on their profile page.

Access Management

- This page allows you to grant friends temporary access to your lock.
- A drop down list of your current friends is provided.
- The time field will be grayed out if the access box is unchecked.
- Two lists of time options will be provided, to choose a range of time where your friend can access your lock.
